

Roblox Parent Guide

Complete privacy & chat lockdown walkthrough — no technical knowledge required
October 2026 · digitalsafetyknights.org

WHY THIS GUIDE EXISTS

Roblox has over 70 million daily active users — most of them children. In April 2026, following state lawsuits (LA County, Oklahoma), Roblox rolled out real improvements: chat is now off by default for under-9 accounts, and direct messages are auto-blocked for under-13 accounts. That's genuine progress — but defaults can be quietly reset by an account-type change, an age misentry, or a future update, so this guide is about verifying and locking down every setting, not just enabling it once.

⚠ Important: Roblox's default settings for teens (13+) still allow strangers to message your child, follow them into games, and see their activity. This guide changes all of that.

STEP 1 — ENABLE ACCOUNT RESTRICTIONS

- 1 Log into your child's Roblox account at roblox.com
- 2 Click the gear icon (top right) → Settings
- 3 Go to Privacy tab → Enable "Account Restrictions"
- 4 This limits your child to only Roblox-curated content and disables all chat with strangers

STEP 2 — VERIFY CHAT SETTINGS (DON'T ASSUME THE DEFAULT IS ENOUGH)

For accounts registered as 13+, or any account where age was entered incorrectly, chat defaults are much looser. Check every one of these directly:

- 1 Settings → Privacy
- 2 Set "Who can chat with me in app?" → Friends
- 3 Set "Who can chat with me in game?" → Friends
- 4 Set "Who can message me?" → Friends
- 5 Set "Who can follow me into games?" → No one
- 6 Set "Who can join my game?" → No one or Friends

STEP 3 — SET UP A PARENT PIN

A PIN prevents your child from changing the settings you configure.

- 1 Settings → Security
- 2 Enable "Account PIN" and set a 4-digit PIN only you know
- 3 Now your child cannot change any privacy settings without your PIN

✅ Tip: Write your PIN down and store it somewhere safe — not in your phone where your child might find it.

STEP 4 — ENABLE PARENTAL CONTROLS (ROBLOX PARENT ACCOUNT)

- 1 Go to roblox.com/parents
- 2 Link your parent email to your child's account
- 3 Enable monthly spending notifications
- 4 Set content maturity filters — choose "Minimal" for younger children

STEP 5 — WARNING SIGNS TO WATCH FOR

Even with all settings configured, talk to your child regularly. Watch for:

- Being secretive or hiding their screen when you walk by
- Receiving gifts, Robux, or game items from people they don't know in real life
- New "friends" they met only in Roblox
- Someone asking to move the conversation to Discord, WhatsApp, or another app — see our Discord Parent Guide, since this exact handoff is how the FBI-investigated "764" network operates (October Journal issue)
- Feeling upset or anxious after playing
- Someone claiming to be a Roblox developer or administrator

⚠ Red flag: Legitimate Roblox employees will NEVER ask for your child's password, personal information, or ask to move conversations off the platform.

STEP 6 — HOW TO REPORT & BLOCK

Block a user in-game: 1. Click on the player's username 2. Select "Block User" 3. Select "Report Abuse" and choose the reason

Report from the website: 1. Go to the player's profile page 2. Click the three dots (⋮) 3. Select "Report"

CONVERSATION SCRIPT FOR PARENTS

Use this with children ages 6–12:

"I want to talk about Roblox for a minute. I love that you enjoy it! I just want to make sure you're safe. If anyone in a game ever asks for your real name, where you live, your phone number, or asks you to talk somewhere else — you come tell me immediately, no matter what. You won't be in trouble. I promise. Can we agree on that?"

QUICK REFERENCE CHECKLIST

- ☐ Account Restrictions enabled
- ☐ Chat set to Friends only (verified, not assumed)
- ☐ Follow into game set to No one
- ☐ Parent PIN set
- ☐ Parent account linked at roblox.com/parents
- ☐ Content maturity filter set
- ☐ Child knows how to block and report
- ☐ Child understands the Discord-handoff red flag
- ☐ Regular check-in conversation scheduled
